SerDes Link test channel

J1–J3 and J2–J4 are the two halves of the differential channel,
measured as a 4-port in the order TX+, TX–, RX+, RX–.

J5–J6 is the thru line, measured to remove the connector and launch
from the 12 in results. Every shield ties to the ground pour and stitching vias.

Jack Pham
Two 12 in 50 ohm microstrip lines and a 1 in thru, edge-launch SMA
